

## HEALTHY CONTROL PARTICIPANTS NEEDED

### BIOMARKER STUDY FOR TREATMENT RESPONSE in ATTENTION DEFICIT HYPERACTIVITY DISORDER (ADHD)

The aim of this study is to identify physical and psychological markers that predict treatment response to a stimulant medication in children diagnosed with **ADHD**.

**To qualify, your child must be between the ages of 6-17. Your child must be fluent and literate in English, as well as healthy with no prior history of ADHD.**

Your child will be required to satisfy study criteria and attend a medical screening and clinical assessment before being permitted to participate in the study.

- The study will involve two 6-7 hour testing sessions and two additional phone and internet follow-up sessions.
- Your child will be asked to provide a saliva sample, answer questions and perform various tasks (e.g. memory recall) while their brain activity is measured.
- You may be asked to help your child complete some of the assessments.
- You will be compensated for your time and participation in this study.
